The future of metrology is here today through an impressive combination of versatility, performance, and usability that will forever change the way you measure. The shop-floor-inspired Optical Tracker from NDI combines all of the functionality of a laser tracker with the advantage of real-time, target-based, digital photogrammetry. With full, multi-object, 6DOF measurement capability, NDI's all-in-one tracker can do more than any other single technology, eliminating the requirement for multiple systems or expensive upgrades.

Northern Digital Inc has been supplying industrial Metrology solutions for over 25 years. NDI has deployed thousands of target-based systems to companies all over the world, with applications ranging from dimensional control to airframe stress analysis.
