Sale Price
\$99,750.00

Immediate Delivery!
(Machine New is \$112,500)

FOB—Winston Salem, NC

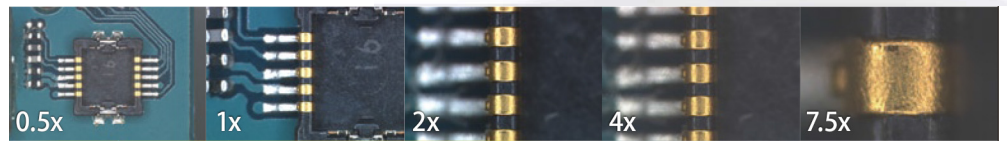

This is Nikon's latest high accuracy vision system. This unit has Nikons legendary through the lens scanning laser for profiling and fast throughput when you need it. No other system on the market can compete with the optics and edge detection capabilities.

Standard products alone will not always solve your measuring challenges. That's why buying from Crofts & Saunders is important. We are dedicated to servicing the customer with training, fixture design, programming as well as preventative maintenance and calibration services.

Proudly Serving our Customers for
60
YEARS

Crotts and Saunders Proudly Presents this Demonstration Special. This is the latest technology in the Nikon high accuracy Vision Platform. You can see this system in action at our Technical Center in Winston-Salem.
